Digital Technology in Production Development

## 23<sup>rd</sup> Annual RAPDASA Conference

Digital Technology in Production Development, the topic for the 23<sup>rd</sup> annual conference aims to accelerate Africa's manufacturing industry for inclusive economic growth, increase the competitiveness of its economies, and improve the livelihoods of its people.

The conference aims to connect experts from industry, academics and students in additive manufacturing, materials engineering, rapid product development, electrical engineering, pattern recognition, robotics and mechatronics to present research, network and expand the fraternity that has been built by the three conferences.

The conference will offer opportunities for participants from industry, R&D institutions, academia and government to connect and collaborate to grow the next generation of advanced manufacturing enterprises across the continent.

## Digital Technology in Production Development Conference – 9 to 11 November 2022

### RAPDASA-RobMech-PRASA-CoSAami

- Design and Additive Manufacturing of Titanium Parts (Pre-conference) — 8 November 2022
- Digital Technology in Production Development — 9 to 11 November 2022
